UI/UX Design Architecture

1. Core UX Strategy & Design Principles

- **Responsive & Adaptive:** the web page will be easy to use and adaptive because responsiveness.
- **Low Cognitive Load:** Large typography, simple vernacular terminology (e.g., "Tractor", "Harvester"), and clear iconography.
- **Minimalist SPA Navigation:** Smooth view toggling without full-page reloads to accommodate variable rural network bandwidth.

2. Color Palette & Visual System

Primary Color : Agri Green	Secondary color: Earth Gold	Background and surface Color : Eastern Blue and White

3. User Journey & Wireframe Layouts

A. Authentication Module (CombineLoginPage.html)

- **Layout:** Centered card with rounded corners over a soft gradient background.
- **UX Toggling:** Single-container view switching using CSS classes. Clicking *"Register as new user"* or *"Forgot Password?"* smoothly reveals the target form without refreshing.
- **Input Design:** Large labeled text fields with floating placeholder text and inline radio buttons for Role Selection (*Farmer / Supplier / Admin*).

B. Farmer Dashboard & Equipment Catalog

- **Header:** Sticky top bar with location pin ("*Showing equipment near: Mhow Gaon*") and search bar.
- **Filter Bar:** Horizontal scrollable pills (*All, Tractors, Harvesters, Tillers, Irrigation*).
- **Equipment Cards Grid:**

C. Equipment Booking & Payment Flow

1. **Details Screen:** Image carousel, specifications (HP, fuel type, owner details), availability calendar picker.
2. **Checkout Modal:** Breakdown of rental duration, total cost calculation, pickup location map snippet.
3. **Confirmation Screen:** Order ID generation, owner contact call CTA button, and SMS confirmation trigger.

D. Supplier Listing Portal

- **Simple Form:** Title, category dropdown, hourly/daily rate inputs, map pin locator for farm/garage, and drag-and-drop photo uploader.
- **Management Table:** Real-time view of active rentals, incoming request approvals, and earnings summary.

4. Interactive UX Enhancements

- **Micro-interactions:** Subtle hover/press scale animations on buttons (transform: translateY(-2px)).
- **Skeleton Loaders:** Gray pulsing placeholders while fetching machinery listings via PostGIS spatial API calls.
- **Visual Status Badges:** Color-coded order indicators (*Green = Confirmed, Yellow = Pending Approval, Gray = Completed*).
